Project KSS

Contract strategies and expert collaboration in building projects

Research question:

Within the context of Last Planner and TAKT production: how can we help team-leaders plan and coordinate three weeks ahead?

In short:

Within the context of Last Planner and TAKT production: how can we help team-leaders plan and coordinate three weeks ahead?

Solution: Introducing the team-leader walk

Result: it does help team-leaders to plan 3 weeks ahead.

Two cases:

- On-site observation
- Interviees
- Research in collaboration with entrepreneur

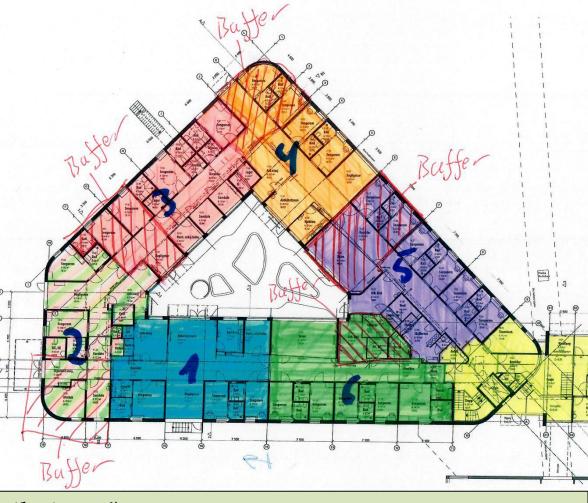

Sports arena

with offices

TAKT planning and production

1) carpenters, 2) technical, 3) carpenters, 4) painters, 5) ventilation, 6) carpenters

"Involved planning" a Last planner approach

Meeting structure

Type of meeting:	Time horizon:
Team meeting	1 week
Team-leader meeting	1-3 weeks
Operations meeting	4-8 weeks
Construction meeting	More than 8 weeks

The team-leader meeting

Challenge: seeing 3 weeks ahead

Solution:

Combining the meeting with a structured walk

Challenge: seeing 3 weeks ahead

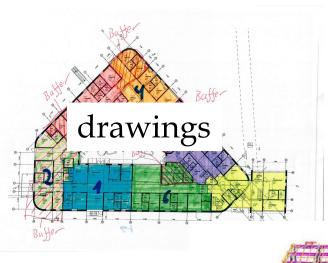

The building as interaction tool

BIM

Meeting room facilities

Experiences gained:

Many things where solved at the walk, freeing up time in the meeting:

- Storage
- Exact locations of pipes, rail and frames
- Exact dimensions of walls, fittings and wholes
- Misunderstandings

Tings not solved at the walk tended to be outside the jurisdiction of the team-leader meeting:

- Mayor deviation from plan
- Issues regarding staffing
- Such things was discovered earlier

The walk helped team-leaders see, plan, coordinate 3 weeks ahead

The walk was more robust than TAKT production...

Further studies:

The interaction between team-leader walk and other interaction tools

Possibility of giving feedback to the higher levels in the project in continuous planning

Considering the roles of the various professions
